Education

University of Houston

Graduation Date: December 2026

Bachelor of Science in Computer Science

Houston, Texas

- Coursework: Networking, Data Science, Data Structures and Algorithms, Databases, Object Oriented Programming

Experience

Halliburton

May 2026 – Aug 2026

Cloud Engineering Intern | Terraform, Azure, Python, GitHub Actions, GitHub Apps, Git, Powershell

Houston, Texas

- Automated Azure infrastructure deployment using Terraform (App Service, Functions, Key Vault, VNet), securing deployments via GitHub Actions OIDC and Managed Identities to eliminate stored credentials.
- Built an automated ingestion pipeline using a GitHub App and Azure Function webhooks to sync files across private repos and index 70+ enterprise assets into Azure AI Search.
- Developed 75% of the web UI, integrated an Azure OpenAI assistant widget, and built client-side search debouncing to reduce backend API calls by 90%.

Derrick Corporation

March 2025 – Jan 2026

IT & Automation Intern | Power Automate, Microsoft Dynamics, Docker, Python

Houston, Texas

- Streamlined 40+ enterprise workflows using Power Automate Solutions with custom error-handling and data validation, securing 99% operational accuracy across \$20,000 in inventory.
- Configured a 60TB Linux-based NAS in a RAID 5 array via Docker containers, managing scheduled media backups and ensuring 100% data redundancy for global company assets.
- Engineered an automated document generation pipeline to replace a legacy SaaS, implemented logic to dynamically populate Word templates from Dataverse, execute PDF conversions, and manage temporary file cleanup.

UH School of Nursing

August 2024 – February 2025

IT Student Assistant | Excel, BIOS, Active Directory

Katy, Texas

- Provided IT support for 130+ faculty/students, managing hardware/software troubleshooting and system transitions.

Lavner Education

May 2024 – August 2024

Computer Science Instructor

Houston, Texas

- Instructed 200+ students across weekly cohorts of up to 25 in C++, Python, Intro to AI, and Robotics fundamentals.

Coder Kids

August 2023 – August 2024

Computer Science Instructor Intern | C++, Lua, Python

Houston, Texas

- Mentored 150+ students aged 8–16 through individualized coding lessons, adapting curriculum to varied skill levels.

Projects

Hybrid Cloud & On-Prem Homelab | Kubernetes, Ansible, ArgoCD, Linux, Prometheus, Grafana

- Bootstrapped a multi-node Kubernetes cluster on Proxmox using Ansible, implementing Longhorn distributed storage to ensure data persistence and seamless failover for stateful workloads.
- Deployed a robust monitoring framework using Ansible, configuring Prometheus to gather critical metrics via a Node Exporter and leveraging Grafana for real-time performance analysis and proactive issue resolution.
- Implemented ArgoCD to automate application lifecycles and cluster configuration via GitHub, ensuring a "Single Source of Truth" and eliminating manual configuration drift.

desktodunks.site | Terraform, Azure (Functions, CosmosDB), Python, GitHub Actions, React

[GitHub Link](#)

- Launched a live production serverless analytics website currently serving 20+ monthly recurring users, featuring a state-driven Admin Dashboard for real-time data entry and game management.
- Architected and deployed a multi-service Azure environment using Terraform, managing serverless functions, Cosmos DB, and Static Web Apps via version-controlled HCL to ensure reproducible environments.
- Developed a Python-based API via Azure Functions with custom header-based authorization and managed secrets to secure NoSQL operations.

Skills & Certifications

Certifications: Azure Administrator Associate (AZ-104, Sept 2026), CompTIA Security+, Azure Fundamentals (AZ-900)

Languages: Python, Golang, SQL, C++, JavaScript, React.js, Node.js,

Infrastructure: Terraform, Ansible, Kubernetes, CI/CD, Docker, GitHub Actions, Git, Linux

Other: Azure (Functions, App Service, Key Vault, AI Search, OpenAI, VNet), AWS, Prometheus, Grafana, NoSQL
